Dash cams coming to Iowa City snowplows

The new system will allow people to check road conditions online.

The Iowa City City Council unanimously approved the plans for a new animal shelter on Monday. The project wouldn’t have been possible without great contributions from the Iowa City community, Mayor Matt Hayek said. “The community support for replacing our flood-damaged and inadequately sized animal shelter has been nothing short of phenomenal,” he said. “I am always impressed by the enthusiasm of the animal-loving demographic in the community.”

The old center was damaged beyond repair in the 2008 flood, and since then, the center has been located in a temporary facility. The animal center has seen an increase in the number of animals in the past year that put a severe strain on the resources of the temporary building and made it not designed to be an animal shelter.

The new construction will be partially funded through a $1.4 million reimbursement from the Federal Emergency Management Agency, along with funding from other local governments and general obligation bonds. In addition to this, fundraising will go a long way towards funding the project.

The Friends of the Animal Center Foundation promised to donate $1 million to the project over a five-year period, starting last year. Councilman Jim Throgmorton said that this contribution from the

UI pushes ahead on museum

The state Board of Regents and the University of Iowa are moving ahead on plans for a new Museum of Art facility.

One of the most sweeping national measures regarding sexual misconduct and violence on college campuses is months away, university officials say their universities are making the necessary early changes required under the act.

There’s a commitment to look at the act and continuously review it to make sure we’re in compliance,” said Monique DiCarlo, the sexual-misconduct response coordinator at the University of Iowa. “It’s definitely something I’ve been talking about with President [Sally] Mason and Vice President [Thomas] Rocklin and [Chief Diversity Officer] Georgianna Dodge.”

The act requires all participating higher education institutions to report compliance with the required policies and procedures by transparency, elaborate on victims’ rights, and provide prevention and awareness programs.

Specifically, higher education institutions are required to do the following:

• Report offenses for domestic violence, dating violence, and stalking, and include those in annual security reports.
• Expand reportable “hate crimes” categories to include those based on gender identity or national origin.
• Include descriptions of the institution’s internal procedures for cases involving domestic violence, dating violence, or stalking.
• Include descriptions of education and prevention programs.

While the UI follows many of the new regulations, the university is to issue a request for qualifications of developers and contractors for building a new museum (The Daily Iowan File Photo)

Grad council tweaks its Constitution

BY MEGAN DOPPE
uga georgia department

After a previous discus-
sion in January, the grad-
uate-student-government voted on changes to its charter on Tuesday. Changes include adding seats for the Gradu-
ate Student Senate and changing names of several board positions.

Under the proposed changes, the Graduate Student Senate would be allotted five delegate seats on the Executive Council, as opposed to the current two.

The five seats would be filled by one from the general disciplinary areas of arts and humanities, social sciences and education, physical sciences and engi-
nering, and at-large. Gillig said the idea for more seats on the Senate was to help provide a more diverse access to the different areas of study in the graduate student popula-
tion and that having more members to speak for that population might be help-
ful.

"It can be daunting for two people to speak for so many groups," Gillig said. Executive Council Vice President Matt Enriquez said that specifying the dif-
f erent areas of study was to help the groups as well.

"We think that break-
ning it down by the areas of study makes it easier for the more diverse groups," Enriquez said.

The other main point of discussion was the removal of board positions in the Executive Council. Gillig and Enriquez said this was mainly for consistency’s sake, so titles in the Senate would be more easily recognizable to those unfamiliar with the Senate.

"There has been an ongo-
ing demand for recognition of our student body as a whole," said President Ben Gillig.

"I think that breaking it down by the areas of study makes it easier for the more diverse groups," Enriquez said.

The other main point of discussion was the removal of board positions in the Executive Council. Gillig and Enriquez said this was mainly for consistency’s sake, so titles in the Senate would be more easily recognizable to those unfamiliar with the Senate.

"Implied signals are
more attention on campus, which means that they might do it for
the more diverse groups," Enriquez said.

**LETTERS TO THE EDITOR**

**UI should lead in preventing sexual assaults**

If one believes President Sally Mason’s statement that sexual assault is a “taboo subject,” then the administration should not just sit on the fence in the dance forms that I perform, I must assume that the woman is in danger, even if she is a good friend. I know that this dance form is very similar to the “joker” and shows more ap­ roval. Surely they can pick more appropriate footprint, then the ballet dancer must wait for the next time to perform. This plan is a start if it makes me better. We are already in the process of developing innovative policies to ad­ dress the extent of the problem. So far during this aca­ demic year, university officials have received eight reports of sexual assaults and one report of an at­ tempt to commit rape. Eight sexual assault allegations, in fact, are already in the process of being investigated.

**COLUMN**

**Disappeared in Nachte Raho**

Friday, the Violence Against Women Reau­ thorization Act of 2013 — formerly known as the Violent Crime Control and Preven­ tion Act of 1994 — will take effect on college campuses nationwide in an effort to reduce rates of rape, attempted rape, stalking, and domestic violence.

Under this new rule, participating schools will be required to meet stricter standards regarding reporting crime statistics and to provide victims with written versions of their rights to a variety of support services and options for seeking jus­ tice. The law also clarifies the minimum standards for drop-down menus, such as the singular-sex option.

Gloria Greenwald, a vice president of the Violence Against Women Act, greeted the new rule with a statement: “This new rule will help schools comply with their obligations under the Violence Against Women Act.”

The law was enacted to ensure that schools comply with their obligations under the Violence Against Women Act.

Students to hold conference on assault

Student officials from the regent universities will hold a telephonic conference to discuss sexual assault.

**History of Support: Laws protecting students from sexual violence and harassment**

**1972**
- **EDUCATION AMENDMENTS**
  - Title IX prohibits sex discrimination in higher education.

**1990**
- **CIVIL RIGHTS ACT**
  - The law requires participating postsecondary institutions to annually disclose campus crime statistics and security information to the federal government.

**1994**
- **VIOLENCE AGAINST WOMEN ACT**
  - The law established federal legal definitions for domestic violence, dating violence, sexual assault, and stalking.

**2013**
- **CAMPUS SAVE ACT**
  - Amended the Clery Act with the reauthorization of the Violence Against Women Act to mandate enhanced prevention and awareness programs for sexual assault, intimate partner violence, and related offenses.

**2014**
- **CAMPUS SAVE ACT**
  - Schools must report compliance with Campus SaVE Act in their Annual Security Reports and have the act fully implemented by this date.

---

**Students to hold conference on assault**

Student officials from the regent universities will hold a telephonic conference to discuss sexual assault.

Student leaders from the three regent institutions will meet to work on the conference.

Members of the University of Iowa’s Student Government and Executive Council for Graduate and Professional Students in Iowa City organized a teleconference with executives from Iowa State University and the University of Northern Iowa.

Student leaders will discuss strategies that campuses are using to try to prevent sexual assault, as well as support for survivors and communication with law enforcement.

Data were released in the regents’ packet about an increased number of reported sexual assaults on the Iowa State campus and the University of Northern Iowa campus.

In reaction to the recent controversial incident at the University of Iowa, international student Hannah Walsh said, “I think that the one case that happened at the University of Iowa is a very good example of why we need to have more education.”

At Iowa State, there were 13 reported sexual assaults in 2013, an increase from 2012’s nine reported assaults.

At the University of Northern Iowa, there were two reported cases of sexual assault in 2013, up from the one reported case in 2012.

“Sexual assault is a problem that affects all campuses,” said Executive Council President Ben Gillig. “The government here has garnered some ‘trial by fire’ experience, and we’re excited to share that.”

Gillig will attend the meeting with Vice President Matt Ensign and UISG President Megan Deppi.

Spencer Hughes, the president of the ISU Student Body, said that sexual assault is a problem that must be confronted by all campuses.

“Every student deserves to feel safe in their community, day or night, and strong support systems need to exist for those affected by these crimes,” Hughes said.

The student officials will discuss how to address rising numbers of sexual assault on campuses.

the ledge -

Andrew R. Juhl and Giselle S. Hwang-Kim to hallway ledge

We hold these truths to be self-evident (and a little nerdy):

○ Only on the Internet could two nerdly angsty types respond to one another be deemed a “Flame War.”
○ It’s a little ironic that Pi Day repeats each year.
○ The most terrifying scene in any movie is in Jurassic Park in which the dude gets eaten in the bathroom. The scene has undo’d more potty training than green peace and Tisu Bell combined.
○ Gill killed off all friends against COBRA could only have been rallied from its members spending less time in public areas waiting for children to engage in unsafe, morally questionable, or lecture-worthy behavior. Also, probably some target practice.
○ When it comes to an organization whose very name define the idea that its members would trust one another long enough to create an organization to even exist, the Brotherhood of Evil Mutants wins hands-down.

Bill Gates is a very rich man today... and do you want to know why? The answer is one word: versions.

CITY TRUSTYS
Bargfrede, the winter operations chief for the Iowa DOT, said that he is happy that the Iowa City Regional Animal Shelter has been able to come up with a solution to the road conditions problem.

"Pictures are really nice because when you're trying to explain a condition to somebody, there's always the opportunity that how I describe it to you is maybe a little different than what you would imagine in your mind," Greenfield said. "As storms roll in or roll through, people can use the website to make decisions if a show they want to see that night is worth the trip."

The online maps had an approximate user count of 20,338 users on 122,032 visits. The system allows for the Iowa DOT to evaluate the program through user feedback, camera and website performance reviews, and cost-efficiency reports to determine if the system is worth the investment.

"If you're discussing a condition, there's also an ability to check the road conditions without physically having to be out on the road," Bargfrede said. "Generally, supermarket drivers have to ride the roads and check the road conditions. It's very difficult to do that how I describe it.

Iowa women's tennis faces four on the road

Iowa women's tennis will square off with Drake to start a string of away meets.

By ALICE CLASON

The Iowa women's team is preparing for a tough Big Ten match schedule, including their first two out-of-conference matches.

Iowa's season begins with duals in Michigan City, Ind., on February 1st, and will continue with Big Ten meets against Minnesota, Penn State and Northwestern.

"We're excited about the new season," said head coach Ross Payne. "There's a lot of enthusiasm on this team, which is good for the team."
Wrestlers remain No. 2

Buy or Sell: Early thoughts on the 2014 Big Ten Wrestling Tournament

Iowa's three seniors have 0-5 in basketball games played in the state of Michigan.

Iowa guard Devyn Marble shoots against Michigan State on Jan. 28 in Carver-Hawkeye. Marble was 7-of-15 inside the arc. The Hawkeyes lost to the Spartans, 71-69. (The Daily Iowan/Joshua Housing)

The pre-seeds for the 2014 Big Ten Wrestling Tournament were announced Monday.

So, for now, let's assume the pre-seeds hold. Telford will have to top Minnesota's Tony Nelson, Michigan's Adam Coon, and someone from the other side — which could be Northwestern's Mike McMullan, Indiana's Adam Champion, or even Wisconsin's Connor Medak — in order to claim first.

This is not to say that Telford can't win it all. He can. But to do so, he'll have to beat guys who seemingly have his number — i.e. Coon and McMullan. With that in mind, it's hard to peg him as the guy to beat.

Buoy. Pay. McSwain: I'm putting a disclaimer with this buy, though. Heavyweight in the Big Ten is one of the biggest close-ups I can remember — in any sport. With the insane parity in this weight class this season, I really can't persuade myself to pick someone.

But with the risks of argument, I'm going with Telford. The junior has lost to Coon twice, McMullan, and McSwain. He's beat Nelson and Champion of Indiana, among others.

Just as Cody said, he'll have a tough road (presumably), but I like his experience as a junior if he gets Coon, a freshman, at some point on the road.

But again, anyone can beat anyone.

Buy or Sell: Iowa will take second place in the team race.

Goodwin: Buy. I've written this before.
