The Confucius Institute is on the rise.

Lauren Schnaider has been studying Spanish since kindergarten. But the list of language options of- fered at her school just became a little bit shorter.

"I think it’s cool to learn other languages," she said. "Maybe if I travel somewhere else, or if I have a job to be in another country, or need to commu- nicate with people who speak other languages, then I would take it in.

She has taken after-school Spanish classes since kindergarten, but starting next year, every other day she will most likely be taking a study hall instead of attending into Level 1 Spanish.

Recently, because of the budget, all seventh-grade language programs were cut in the Iowa City school district, including all-level German classes.

"I think people in this area are looking for opportunities to inform more people about up- coming events," said Mullins.

Mullins said this collabora- tion between the Office for Research and Development, the Office of the Provost, the Office for the Arts, the Division of World Languages, and the UI Foundation provided funds for the project. The RV was custom-designed by Winnebago Industries. The Mobile Museum will hit the road this spring.

No Heartbleed here, UI says

The Heartbleed Bug has been patched at the University of Iowa.

By JAN HOFFMAN

One software program could have been leaking secrets from Iowa data for almost two years before the hole was fixed last week.

The University of Iowa officials said they patched the Heartbleed Bug, a major software utilization by two-thirds of the Internet that allows web users to exchange "Sensitive" information with a server.

Iowa, like many other universities, has a "Heartbleed" bug which was discovered in April 2014 and fixed in April 2015.

Shannon Becker, 23, Iowa City, was charged April 15 with stealing.

George Borg, 55, Grinnell, was charged with stealing.

Kimberly Christiansen, 19, Cedar Rapids, was charged April 17 with stealing.

Michael Tolar, 21, Iowa City, was charged April 17 with stealing.

Law enforcement officials have released the names of the 16 individuals who were arrested in connection with the theft.

Iowa City, 33, Cedar Rapids, was charged April 17 with stealing.

Linda Peterson, 30, Cedar Rapids, was charged April 17 with stealing.

Since 2007, the Heartbleed Bug has been used to steal passwords from a variety of websites, including those of universities, businesses, and government agencies.

WASHINGTON — Speaking for the first time on an issue that has hurt her since her August 2008 presidential campaign, first lady Michelle Obama on Tuesday night said she will not allow the political drama surrounding the health care law to derail her efforts to make it "more affordable." The first lady spoke at Planned Parenthood Action Fund’s annual gala in New York City.

The event is the biggest fundraiser of the year for Planned Parenthood, which has been under intense scrutiny following the revelation that the Obama administration had allowed certain entities to participate in federal funding programs that previously had been barred from doing so.

Obama, who is a member of the Democratic Party, said she is committed to protecting the Affordable Care Act, which was signed into law by President Barack Obama in March 2010. She said she is working with Congress on ways to make the law more affordable and accessible for Americans.

"This is not an issue of left versus right," Obama said. "This is an issue of ensuring that every American has access to quality, affordable health care."

Post, Guardian win Pulitzer Prizes

The Executive Council provides more grants to cover the cost of student research grants.

By Chris Higgins

More students will have the opportunity to do research following the increase in grant funding. The Executive Council of Graduate and Professional Students has both received more applications for grant funding and accepted more applications for such funds. The council provides grants to students for travel, service, and research.

The council received 750 grants applications for this school year by March 30. Of these, 400 by the same time last year, Thursday, the council has awarded 234 grants. "Those are big increases," said Executive Council President Ben Gilling.

"I think it's indicative of the way we've streamlined the application process," he said. Previous, the group offered four grant proposals and evaluation criteria. The council paid $3,000 for a consular online replacement.

The process was simply as disorganized," Gillig said. "We used to rely on paper applications and paper forms, and that just quality became incredibly unstable."

"Those 201 who were in awarded research grants in the last years in prison if convicted, and vice president and a

"I think this is amazing news," Patrus said. "It's a testament to Snowden's courage and his willingness to expose what the government is doing.

"Snowden, a former contractor employed at the NSA, has been charged with espionage and aiding an enemy of the United States and could spend 30 years in prison if convicted. He has received asylum in Russia.

In a statement issued by the Freedom of the Press Foundation, Snowden said "the brave reporters and their colleagues who kept working in the face of extraordinary intimidation, including the forced disbarment of their legal advisors."

"They're charged with carrying out their work in Russia, including news reports on Russian war crimes and the treatment of journalists across the world," the Freedom of the Press Foundation said.

In addition, the Executive Council has received 179 applications, up from approximately 130 applications last school year. The council has awarded 119 grants this school year, totaling $49,600 this year.

"It was an easy process," said Parker. "It was straightforward. The application was simple and easy to complete."

"I think this is amazing news," Patrus said. "I think it's indicative of the way we've streamlined the application process."

The reporting "helped encourage the very important discussion about the balance between privacy and security, and the decision to hand over so much information to the NSA, administrator of the National Security Agency," he said.

"There's a huge room for improvement and for a grant to be awarded to students," he said.

"It's great that they've got that extra $10,000. The Executive Council has received more applications," Gilling said. "I think that's an increased level of interest that we've had so many applicants."

The council will dole out the $37,000 this school year, the group gave out $5,425 last year, and awarded 14 of the applicants, which totaled $5,625. Last year, there were around 100 applications, where there were around 100 applications last year.

"Part of this follows the sort of avalanche of grant applications. In certain times, there are simply more students applying to the dissertation phase or the post-comprehensive examination phase that they're ready to focus more intensely on these research, but I think that we're sort of dreamers hoping higher in terms of terms of their dissertation proposal, in terms of the data and the experiments they want to do," Gilling said.

"When we provide any type of funding, it's not every dollar we allocate ends up being used for whatever reason whether they're received from other sources, they spend less than had originally budgeted, or some combination of those things," Gilling said. "We usually have money left over at the end of the year."

The Executive Council has completed six cycles of funding approval with one remaining, an increase on previous years.

By Jack Rossi

The gymnastics season has come to a close. After three months of competition, the Iowa men's gymnastics team fell short of its expectations, and now, the team looks toward the off-season.

This will be the team's second off-season under head coach J.D. Reive on which the team will compete in numerous off-season activities and competitions. Reive likes to keep the gymnasts active during the off-season, and it has paid off. The Hawkeye's high score jumped 11 points in just one season, from 426 in 2013 to 437 this season.

They want to do the same thing over the next year.

“We've got a fantastic group of guys to train and stay in shape for,” Reive said. “We've got some signed freshman class coming in early to begin classes with us and train with us. We're very excited.”

With a gym about to be full of eager gymnasts, he has everything planned to the last detail, noting that this is the time to learn and improve the most.

“We've got a super clear path ahead of us of exactly what needs to be done, whether it's the individual kid or the event total and the skills that need to be learned.”

— Jack Rossi, Daily Iowan

“We've got a super clear path ahead of us of exactly what needs to be done, whether it's the individual kid or the event total and the skills that need to be learned.”

— J.D. Reive, head coach

Freshman Cory Patterson is one of those gymnasts who will compete this summer.

Patterson competed in the 2013 Pacific Rim and the 2013 University Games before coming to the Iowa program. He is also a nine-year member of the Canadian National team. This summer, Patterson plans to stay in Iowa to continue to improve his skills before the off-season is over.

“On May 5 I am competing in the Canadian National Championships — other than that, I will compete in any other international assignments I am given,” Patterson said. “But my main focus right now is for next season and to get my difficulty and skills up, because last year I didn't really have any summer to train because I was in Russia competing.”

Other gymnasts will also compete in such events as the Commonwealth Games, and the P&G Championships.

Student Employment Week Employment Week April 13-19, 2014

Each year over 1,000 students are employed through the Student Hourly and Work-Study employment programs. The University of Iowa works to acknowledge the efforts of these employers and their contributions to the achievement of the University’s goals.

The Student Employment week was nominated by their departments for the Student Employees of the Year Award. Special thanks to these fine student employees and their employing departments. A well-recognized student employee excellence was provided to each winner.

Patrick aces the season
Iowa men’s tennis player Dominic Patrick leads the team in wins and hopes for a more successful year.

BY JORDAN RICHER
jricher@daily-iowan.com

Dominic Patrick’s destiny as a Hawkeye has had its ups and downs and it all started with a serious injury whelmed of an whim.

“I am mad,” (head coach) Steve Hufft and a few other Big Ten schools on a whim, and it took off from there,” Patrick said. “From then on, I was a native of Gilbert, IA. Tony Clark has served as the ace of the team, but the ace is a wild card. We have made it a long way from where we started.”

Over the course of the past year, the semifinalists has seen tremendous improvement in his game and has established himself as a key player for the Hawkeyes. Sophomore Avery Meyers is also a valuable player as he leads the team in singles wins, posting a 14-6 record so far this season. Close behind him is Iowa’s top-rated singles player, senior Drieskens, who has compe ted in his last 81 matches.

It hasn’t always been an easy road for Patrick, who experienced a few ups and downs during his first year in the program, as most freshmen do. He primarily played at the No. 5 singles position, recording a 1-5-1 record in his first season.

“We all knew what he was capable of by the way he played in his practice. He’s not the guy who didn’t play the same way in matches.”

Dierckx said. “He was successful as a player, so we take what he has to say and put that into practice.”

Diercky’s excellence has allowed him to play well in his last appearance, as evidenced by his win at the Big Ten tournament. He has established himself as one of the top players in the conference, and has made it a long way from where we started.”

“We all knew what he was capable of by the way he played in his practice. He’s not the guy who didn’t play the same way in matches.”

Dierckx said. “He was successful as a player, so we take what he has to say and put that into practice.”

Diercky’s excellence has allowed him to take the stage and_dictate the course of action.

“As for the combined events, they have been mediocre so far,” said assistant coach Chris. “We have been mediocre at best. We get to a point in the season where we have played well, but we have struggled with consistency.

There have been a few times when we have had a good hit, but we have struggled with consistency. It’s a combination of talent, and if you can get that consistency, you can be a top-five team.

With that said, there is no reason to panic for the Hawks. They have shown in the past that they can be a top-five team. The Hawkeyes are capable of winning big games and have shown that they can be a top-five team.

Iowa is the best team in the Big Ten, according to Patrick. “We have been mediocre so far, but we have shown that we can be a top-five team.”

Iowa is the best team in the Big Ten, according to Patrick. “We have been mediocre so far, but we have shown that we can be a top-five team.”

With that said, there is no reason to panic for the Hawks. They have shown in the past that they can be a top-five team. The Hawkeyes are capable of winning big games and have shown that they can be a top-five team.

Linebacker as a teacher

Quinton Alston is poised to become Iowa's next middle linebacker and, in the process, the leader of the Hawkeye defense.

"Can I have a piece of paper?"

Quinton Alston approached the reporter on the Valley Stadium sidelines on April 12 with that question. He wanted a piece of paper because he needed to teach something. So he took one, said "Thank you," and walked over to a cooler. There, with teammates Cole Fisher at his side, he drew up something that perhaps confused Fisher, Rodriguez and one should consider Black and Gold faithful a little bit and worries some Iowa fans.

"Truth told, he worried about the Black and Gold faithful a little bit for good reason. Whoever steps into the shoes once filled by James Morris, Anthony Hitchens, and Christian Kirksey will be, for good reason. Whoever steps into the shoes once filled by James Morris, Anthony Hitchens, and Christian Kirksey will be, in the absence of this guy, in the absence of this guy because he needed to teach something.

"He is a senior, after all. His demeanor. He is a senior, after all. He is a senior, after all."

Hitting and losing the first game of the season, but by how much? The Hawkeyes have

Examining Hawkeye baseball

Following a series win over Northwestern, the Hawkeyes are now more than halfway through the regular season. The Daily Iowan's baseball reporters look at some key questions as Iowa prepares for Western Illinois.

Field events spark Hawkeyes

The Hawkeyes have improved over their outdoor season, but by how much?

With three weekends of meets in the books, Iowa has reached the halfway point of the outdoor season. As hopes run high for the indoor season, spring has presented a rejuvenated track squad that is literally making leaps and bounds.

Short and Medium distance/Relays: B

This season, Hawkeye short-distance runners have been something of an up-and-down affair. Senior Tevin-Cee McCoy and sophomore James Harrington have been fighting injuries during the last part of the indoor season and first part of the outdoor season, so the Hawkeye men's indoor team was right there last year. He just wasn't on the field for the last three seasons (just 24 total tackles while seeing action in 29 games). But even with the inexperience, Ferentz has constantly praised Alston this spring.
