A member of the state Board of Regents resigned Thursday evening effective immediately, citing her family’s move. “Given my family’s recent move out of state, I wish to resign from the Board of Regents,” Regent Nicole Carroll said in a statement.

“The governor has not set a timeline for naming a replacement,” Branstad spokesman Jimmy Centers said in an email.

Branstad spokesman Jimmy Centers said. “This is a highly dedicated board, and all of its members work tirelessly for Iowa and its public universities.”

Gov. Terry Branstad will nominate a new regent to the vacant seat. He or she would have to be confirmed by the state Senate and all of its members work tirelessly for Iowa and its public universities.

“I want to thank everyone for the wonderful opportunity to serve on the Board of Regents. This is a highly dedicated board, and all of its members work tirelessly for Iowa and its public universities.”

Carroll was appointed in 2011 along with current Regent President Bruce Rastetter and President Pro Tem Katie Mahland. Carroll’s term was set to expire April 30, 2017.

Carroll, an attorney, is from Carroll, Iowa, a town in the central western section of the state. She earned a bachelor’s degree from Iowa State University and a law degree from the University of Iowa. She also served 12 years on the Carroll School Board. Her hometown is Story City in central Iowa. She earned a bachelor’s degree from Iowa State University and a law degree from the University of Iowa. The Iowa City Planning and Zoning Commission debated demolishing a group of Iowa City buildings.

By RACHEL GREEN

The Iowa City Press-Citizen

The Iowa City Council will remain as the main decision maker for the city's buildings, after a decision by the Iowa City Council to dissolve the Planning and Zoning Commission.

The three buildings were built in the mid-19th century and are located along South Dubuque Street. Some in the community are calling for the buildings to be preserved, while others are calling for the buildings to be demolished.

The three buildings are part of the story of Iowa City's history, according to the director of the Iowa City Historic Preservation Commission. The buildings are significant to the people who made Iowa City what it is today. The buildings included in the story of Iowa City.

The Planning and Zoning Commission met on Thursday to discuss a resolution to demolish the buildings, but the commission decided to dissolve the commission and leave the decision-making process to the Iowa City Council.

The commission issued the following statement:

"Our purpose as the Planning and Zoning Commission is to provide a forum for citizens to share their views on planning and zoning issues.

"We have decided to dissolve the commission in order to give decision-making power back to the Iowa City Council. This decision was made after careful consideration of the current political climate and the needs of our community.

"The Iowa City Council will now be responsible for making decisions on planning and zoning issues.

"This is a difficult decision, but we believe it is in the best interest of the City of Iowa City.

"We want to thank all of our members for their service and dedication to the Commission. We wish them well in their future endeavors.

"We are confident that the Iowa City Council will make wise and informed decisions for the benefit of all citizens of Iowa City.

The UI branch of the Association of Indian Development marks the 30th anniversary of the gas disaster in Bhopal, India.

By DANIEL VALENTIN
daniel-valentin@pennlive.com

University of Iowa graduate student Astha Singhal was in a vegetable plant when a gas leak caused a major gas leak, causing the Bhopal gas disaster in India two months after the accident.

"My mother told me she was in the streets with multiple children when the gas was released," she said. They were facing huge amounts of pollution and the gas was being released into the air.

The disaster 30 years ago killed tens of thousands of Indian citizens, and caused lifelong disability and injuries. The disaster is still impacting the lives of those affected.

Since Dec. 2, 1984, the population of Bhopal, Indi- a has been suffering because of exposure to toxic waste containing methyl isocyanate that took the lives of many communities from the gas leak at a Union Carbide India Limited pesticide plant.

"We must learn from lessons given by the Bhopal gas disaster and take care of our environment," said Astha Singhal, a graduate student.

A Prayer For Ruin, a documentary depicting the event, has been released recently.

The government of India has not provided health care or compensation for the survivors affected by this tragedy.

Parysathad said the Indian government has not provided health care or compensation for the survivors affected by this tragedy.

The event included a presentation and screening of the film in the trash. Food, and don't throw it away about 25 percent of the food they pur- "By reducing the amount down in a house, and ages of par- "The challenge for Iowa is we haven't had the resources, and when we have had the resources, we couldn't put them forward for the city of Pune from the city of Pune. I work in the city of Pune and I have seen the effects of this disaster. I have seen the effects of this disaster."

This year, $4.5 million has been spent statewide to help people and schools reduce pollution. The state has not done so.

In addition to utilizing solar energy officials are trying to reduce transportation, carbon and chemical dioxide in order to reduce pollution.

"Every state is going to have to work with the utility companies to find the money," she said. "They can start selling energy..."
Column Freedom to marry gaining

Two people lack genes, not knowing the impact the other is about to make on their lives. As they decide, they are not thinking of the rest of their lives together, but what they can do or cannot do in their lives. In 15 states, the government has the right to decide.

In 2003, the status of marriage equality was reviewed by the U.S. Supreme Court in the case of Lawrence v. Texas, where a plaintiff sought to marry his same-sex partner. The Court ruled that laws discriminating against same-sex couples were unconstitutional. Since then, many other states did the same, so the gay marriage movement began gaining momentum.

New, additional states have also lobbied on their own marriage, gay marriage, sex, and law. The number of states with laws in place is here.

In 2014, Montana passed an amendment stating that marriage is between a man and a woman. This amendment received a lot of backlash in Montana and other states considering similar laws.

The United States has come a long way but not far enough. Out of 50 states, only four (California, Oregon, Washington, and Colorado) have marriage equality laws. Montana did not change their laws to accommodate same-sex couples.

Recently, it seems that politicians and departments on various levels have become a broken promise. In its current state, no one person or organization has the same protection of the law that heterosexual couples have by other political groups.

The NFL is undeniably the most important sports organization in the United States. It has had a significant impact on domestic assault.

As the NFL continues to make strides in the fight against domestic violence, it is important to acknowledge the progress that has been made.

LETTER TO THE EDITOR

Veteran graduation letter figure wrong

I recently read the article written by Sarah Valentine about how the University of Iowa is working to support veterans. As a member of the Iowa Veterans Committee and a veteran myself, I appreciate the effort being made to support our fellow veterans.

As a veteran of the U.S. Army, I have seen the impact that organizations like the Iowa Veterans Committee can have on the lives of our fellow veterans. The efforts of the committee are vital in supporting our fellow veterans and ensuring that they receive the recognition and support they deserve.

In conclusion, I would like to commend the Iowa Veterans Committee for their efforts in supporting our fellow veterans. Their dedication and hard work are greatly appreciated and make a significant difference in the lives of our veterans.

COLUMNS

NFL needs zero tolerance policy

The NFL needs zero tolerance policy. This means that when a player commits an act of domestic violence, they should be suspended for at least one game, and if the behavior occurs again, the player should be released from the team. This policy would send a strong message to players that domestic violence is not tolerated in the NFL.

The University of Iowa’s College of Law has been planning a new degree program it hopes to start by next fall.

The program is called the Master of Studies in Law and will potentially be presented to the state Board of Regents at its next meeting.

College of Law Dean Gail Agrawal said she started thinking about the program around a year ago, and even after she got a group of law professors together, with Bohannan leading the way, to formulate the specifics of the program.

“The value of the program is that it could supplement a variety of degrees and be applied to so many careers,” Agrawal said.

“Who would be interested in the Master of Studies in Law field?”

Man faces motor-vehicle, drug charges

Authorities have accused a man of stealing from several vehicles and possessing marijuana.

Theft of one of the vehicles, a new 19-inch 60-yard-long Hawkeye Express bus, has been under investigation for several weeks.

Authorities have accused Taneesha Wise, 23, for stealing a ring from a jewelry store.

Wise later reportedly admitted that she was planning on stealing a whole ring instead.

She was unable to leave the store because employees stopped her.

Wise entered a store to inquire about jewelry. Once the store clerk showed her a large $7,000 ring, Wise decided she needed to steal it.

Once she was on the run, she stopped at the Drake school, said the Drake school, said the Drake university law school is the only other school in the United States in Law, called the Master of Jurisprudence.

Preston Nicholson, the associate director of admissions, said that the program’s goal is to bring in a new population of people who have been out working for a while and get their bachelor’s degree.

“The program would be 30 credit hours, so it could be completed in one year of full-time classes or four years of part-time classes,” Agrawal said, and it would also be a cheaper option than a traditional law degree.

Bohannan said she submitted the program’s proposal to both the law-school faculty and the Council of Provosts for review, and it was approved at the annual meeting in June of this year.

“It’s opening us up to a lot of different kinds of people, who have been out working for a while, people who maybe got their bachelor’s degree,” she said.

“We think this has the potential to bring in a lot of different kinds of people, who have been out working for a while, people who maybe got their bachelor’s degree,” she said.

The program will be a master’s program aimed at giving students experience in the legal system and to specific areas of the law for people who don’t want to practice law but who run into legal issues in their work,” law school Dean Gail Agrawal said.

“Who don’t want to practice law but who run into legal issues in their work,” law school Dean Gail Agrawal said.

“The program would be 30 credit hours, so it could be completed in one year of full-time classes or four years of part-time classes,” Agrawal said, and it would also be a cheaper option than a traditional law degree.

Bohannan said she submitted the program’s proposal to both the law-school faculty and the Council of Provosts for review, and it was approved at the annual meeting in June of this year.

“After that, this sub-committee will review it, possible from the Council’s meeting, and if they approve, the proposal will then go to the American Bar Association for a final review,” Bohannan leading the way, to formulate the specifics of the program.

“It’s something that we realized was important because we hear regularly from people who say ‘I’d like to take a law-school course. I need to know a little bit more about ‘fill-in-the-blank,’ but I don’t need a law degree because I want to be an engineer or a business person,'” Agrawal said.

“The value of the program is that it could supplement a variety of degrees and be applied to so many careers,” Agrawal said.

“Who would be interested in the Master of Studies in Law field?”
Andrew R. Juhl, Professor of Letters:

Dear DNA: The exact Mendelian side of me having the following combination never lied: my father’s weak chin, my mother’s unibrow. I would skin, my father’s big nose, my mother’s splotchy skin, my father’s slow metabolism, and my mother’s unibrow. I would have liked to have done better. Then again, I’m growing as would have my parents.

Hawks' offense heats up

By KYLE MANN

The Iowa women's basketball team will host the Hawkeye Challenge this weekend, and one of the four participating teams will head to the 2014 NCAA Tournament.

Will Lisa Blodgett's offense continue to effortlessly operate like clockwork?

In the team's exhibition game versus St. Ambrose, it scored 52 points in the first half and put up 97 points in the second half. Iowa's 2014-15 season begins today against Bradley at 6 p.m. in Carver-Hawkeye Arena.

Will Iowa get a rematch with Dayton?

After playing Pepperdine today, the Hawkeyes will face the winner of a game between Tennessee-Martin and Dayton to decide who plays for the title on Saturday.

In the Hawkeye Challenge last season, Iowa and the Flyers took part in a barnburner, with the Hawkeyes ultimately pulling out what proved to be one of the best games of the season.

GORDON POSES HUGE CHALLENGE

The Iowa football team has to stop the best running back in the nation to have a shot at the Big Ten West title.

By DANNY PAYNE
danny-payne-1@uiowa.edu

There wasn’t any hesitation in Mark Weisman’s answer when a member of the media asked him to compare his game with Melvin Gordon’s.

“There’s no comparison; he’s the best running back in college football,” Weisman said. “He’s unbelievable, and he’s a force to be reckoned with. If he’s going to be a big challenge for us to be able to contain, to stop him, whatever it may be.”

As anyone who pays the smallest attention to college football knows, Gordon is coming off the best single-game rushing performance of any running back in NCAA history. He rushed for 406 yards in three quarters against Nebraska last weekend.

Iowa’s defense, which ranks sixth in the Big Ten and allows an average of 147.8 rushing yards per game, has been gashed by the league’s premier rushing attacks it faces thus far.

BASKETBALL

TEXAS 71, IOWA 57

Second half surge was too much for Iowa, burying a left-handed lay-up. He was also fouled.

The Hawkeyes had been able to throw a plethora of big holes at the Longhorns, including forward Jonathan Holmes, who led the Longhorns with 19 points and 17 in the second half and 5 rebounds.

Instead, Iowa relied heavily on free throws and 3-pointers early, which the Hawkeyes had plenty of in the first half. Iowa got to the free-throw line 13 times in the first half, converting 11. It also went 3-of-8 from beyond the 3-point line.

The worst performance came when Indiana’s Tevin Coleman — who ranks second behind Gordon with 167.8 yards per game — ran for 219 yards and 3 touchdowns on the Hawkeyes. Adding another layer of importance of Gordon is the league’s premier rushing attacks its defense faces thus far.

Second half surge was too much for Iowa, burying a left-handed lay-up. He was also fouled.

Texas was held to just 32.3 percent from the field in the second half. In the second half, Iowa’s guards combined for 3-of-8 from beyond the 3-point line.

Michael Kelly knows his performance from last weekend’s Luther Open can be improved upon. He can be more dominant. He can score more points. He can take his wrestling to another level.

Those were his goals for this year, after all.

But before he talked about building. Iowa’s guards continued to shoot just 3-of-20 from the floor.
