The University of Iowa saw an 11.4 percent increase in the number of students who were admitted in the last two school years. There was a more than 7 percent increase in the number of students who applied.

By JORDYN REILAND

Following years of construction and rehabilitating after the 2008 flood, University of Iowa President Sally Mason says the campus is now poised to grow its student enrollment this coming fall.

Mason told The Daily Iowan in a monthly one-on-one Q&A that admissions and enrollment-management officials try to estimate through tracking the best number of students to admit to the UI each year. This year, UI officials hope to see around 500 more students on the fall’s first-year freshman class, compared with last year’s freshman class, compared with the last school year.

Mason said while that there is an opportunity for growth, the university must remain cautious in slowly building the increasing enrollment.

“We feel comfortable that we can handle 500. The new residence hall will open this fall, and we haven’t yet shut down the Quad Residence Hall,” she said.

“We’ve got the capacity in terms of beds to house new freshmen, and we’ve got the capacity in terms of classes for them as well. We’re trying to be pretty careful as we build the numbers and grow moving forward.”

Brent Gage, the associate vice president for Enrollment Management, and the school is still in the very early stages in terms of developing predictive models to estimate class sizes, so while the numbers look favorable, there is still time to plan.

“I think my really exciting time,” he said “I think we’ve kind of finally recovering and getting more facilities to bring more students to the University of Iowa.”

Undergraduate admissions

Per the Education of the University of Iowa, there are over 11,000 students at the University of Iowa who are involved in the University of Iowa’s Undergraduate Admission Office. This number is increased by more than 11 percent from Fall 2014 to Fall 2015. Admissions data was categorized by first-time freshman, first-time transfer/International, and Towel.

Fall 2014 admits

- 1,894 first-time international
- 1,623 first-time domestic

Fall 2015 admits

- 2,071 first-time international
- 1,594 first-time domestic

A temporary emergency homeless shelter located in the old Aldi building on South Gilbert Street has extended service for two more weeks.

The shelter — which was originally planned to be open from December to February — is now scheduled to be open through March.
No age barriers for LGBTQ

Community members meet for an intergenerational LGBTQ dialogue.

By REN MARKS
marksren@the-daily-illinois.com

It isn’t often you get four generations in the same meeting.

Police senior citizen to account for high arrest, members of the Illinois LGBTQ community met Monday to sparked a discussion about intergenerational LGBTQ issues.

Approximately 30 people attended the meeting, covering a span of about four generations.

Carolyn Malone, the University of Illinois donor and volunteer coordinator who created and facilitated the event, said she was very happy with what it turned out and believed others were, too.

“I think people were excited, really appreciated the opportunity to share their own stories, but also learn about the experiences of folks who are in similar age to them, but who are also different,” she said.

City High School senior identity/English teacher, who attended the meeting with one member of the Illinois LGBTQ community, said she thought the discussion was important for youth, and the meeting was very educational.

“What I really want to do is getting it out there for everyone, understanding in matter of their age, and their story, and all of an experience to hear their stories,” she said and add the positive difference between her story and the stories of other generations.

“They struggled a lot more, and I feel grateful for the generation I was born in, and I feel really blessed,” she said.

“Opening up a space for people to be heard is always good, to be able to speak and to be able to listen,” she said.

In part, one of the reasons Malone said she became a part of the discussion was because of the lack of events which specifically involved the LGBTQ community.

“There aren’t a lot of opportunities for the queer community to get together and talk about these issues that we face and how we impact each other across generations, especially younger folks,” she said.

This was the first time in an intergenerational discussion has been held, and Malone said it is crucial to the community that we address this. She said the outcome also need to hear from the community for a conversation between generations.

“This is the first time we need to talk to each other,” she said. “We came together today to talk about this opportunity for people to talk to each other.”

The topic the meeting was a response around community building and art, and Malone said, with members sharing their unique experiences, conversations, stories, and learning about how to continue to develop a community despite age differences.

Jamie Nene, the community manager of In the Room, which is a meeting to listen and understand where people in the community were in their own way of this meeting went well.

“I think it was great, it was great for people to be heard in terms of being able to speak and be heard and be listened,” she said.

Although this discussion was facilitated by Malone as a part of the Visibility Action Team, a group of volunteers that advocates and supports Older LGBTQ residents of Johnson County, Malone said any future conversations would have to be organized and facilitated by members of the community.

Therefor, although this was the first intergenerational LGBTQ community discussion, it might be the last.

However, the event appears to go great, but after the meeting finished, several attendees volunteered to host and organize the next event, including Nene and Rahnke.

“The community has to pick this up,” she said. “The visibility action team would like to do the meeting again and has to have the drive to do the.”

The University of Iowa offered admission to 12,427 first-year freshman for the fall of 2014, according to the University’s admissions office. At the start of the school year, 4,664 first-year students came to campus. Of those, 4,649 were international students representing 24 countries. Eight percent of the student population was Latino, and 4 percent of students are African-American, according to the Admissions Office website.

Iowa residents made up roughly 41 percent of the Class of 2018, and 30 percent of students are Illinois residents.

In 2008, the panel will collect applications through a completely online process. Media coverage of Rollins’s reception, in December 2014, and the one over the past few years is frequently associated with the UI’s efforts to recruit and enroll students. Mason also predicted that this year’s freshman class will be among the most diverse incoming class.

“[What’s gratifying to me] is that it’s every year, we see the number of applications grow- ing, but what we’ve see- ing in this point in time is acceptance of admits, and housing, and those kinds of things that suggest that we’re going to have a very large and strong freshman class,” she said. “In fact, predict, because I won’t be very surprised if we decide to do that. I will predict that we will once again have the larg- est, the most talented, and the most diverse freshman class that we’ve ever come in next fall.”

THOUGH UI students will drive the campaign, oversaw the recruiting of students from the University of Iowa, Iowa City, IA 52242, address to the University of Iowa Lecture Committee.

The number of in-state and out-of-state students admitted to the University of Iowa increased between fall 2014 and fall 2015.

The number of in-state students admitted in fall 2015 represented a more than 9 percent increase in admissions from fall 2014. More than 11,300 in-state students applied for fall 2015.

The number of out-of-state students admitted in fall 2015 represented a more than 7 percent increase in admissions from fall 2014. More than 11,300 out-of-state students applied for fall 2015.

Butler said UI officials have seen growth in the number of students interested in both the College of Engineering and the Tippie College of Business.

**EDITORIAL**

**EPA needs more oversight**

L ast week, news broke that USDA Food and Drug Administration has licensed thousands of medical devices in use at a medical center in Los Angeles and elsewhere that the agency hadn’t made any recommendations for different safety requirements or cautioned against using some products.

The revelation has called into question the FDA’s regulatory practices and has raised fresh questions about the FDA’s mission to regulate medical products, such as the devices used by Seattle, Pittsburgh, Chicago, and other areas in hospitals and emergency rooms. In 2013 and 2014, the FDA reportedly received 75 reports of serious harm from medical devices under the agency’s jurisdiction. That includes a diabetes drug and a painkiller that increased suicidal thoughts and behavior in teens.

The news, known as the “scope and definition” of the “grandfather” loophole, has led to a storm of criticism in Congress. Rep. Ted Yoho, D-Fla., has requested a congressional committee hearing to investigate the device and the drug-resistant bacteria it can cause.

In a letter to Congress, Lieu wrote that the cost of Bionex equipment, which is sold in the eye care market, is not the price or reimbursement that patients or their providers pay. Lieu says that in order to increase the number of patients who use the device, the FDA should take steps to ensure that the device is safe and effective.

We believe this is dangerous and antithetical to the public interest and the health of our fellow citizens. We urge the FDA to take action on these issues in an oversight hearing. The American public has the right to know what the FDA practices affect them.

**Two sides to Bitcoin**

B itcoin is relatively new, as a currency or a form of value. Since it is not tied to a government, it is not subject to government regulation. Bitcoin is a digital currency that is created and exchanged among users through a network of computers. It is a form of currency that can be acquired anonymously, without leaving a physical record of who owns what.

However, the government’s role in regulation should not be determined by the desire to avoid misuse. If a Japanese man was found with $500 worth of Bitcoin to avoid bodily harm, in Illinois, a suburban police officer would have probable cause to seize or copy electronic files from the computer and to seize or copy electronic files from the computer.

Governments have a duty to ensure that the public is protected from harm. The misuse of Bitcoin may be considered to be the use of the technology for these unsavory practices. However, the potential benefits of Bitcoin outweigh the risks.

Thought to be the gold standard of privacy, Bitcoin differs from traditional forms of currency and is created online in a network of computers. The absence of regulation, and no accountability for misuse, is one of the reasons why Bitcoin is so popular.

The literal language of the constitution, the Commerce Clause of the Constitution, and the保护 the right of the people to use the computer to their advantage, to regulate and to seizing or copying electronic files from the computer.

Governments have a duty to ensure that the public is protected from harm. The misuse of Bitcoin may be considered to be the use of the technology for these unsavory practices. However, the potential benefits of Bitcoin outweigh the risks.

more vegetable in the diet. Yesterday I asked you all that you are now seeing some real positive things in regards to liver, and I said, ‘Oh you mean, we’re going to have to cut out liver. I haven’t had liver since I was a kid when my mother made us eat it one night and I threw it all back at her and she said, ‘Well, there are some pretty positive aspects in regards to this.’ There are some aspects of the community in regards to the very positive, positive diet that we can have on our overall health and well-being, and what it means in communities and cultures. So I hope you’ll be pretty much up about this. We wish up an attitude in virtually every category, whether we’re residents, nonresidents, oringualege in Illinois and elsewhere, and much of this, much of this is going to be a — which generally fall into one of two categories: that’s going to be either housing or AIB campus, the internship opportunities in Des Moines. Do you feel these changes have kept the original mission intact?

Mason: Describing it as a merger, I never used that word. That’s always going to be gifted to the University of Iowa, and it was going to be an opportunity for us to be able to use that campus to serve the greater central Iowa community, particularly in Des Moines. That’s really what’s exciting to me, and that’s what’s exciting to us all that we have the opportunity to serve the community in a very important way.

Jezaki: With the new situation, if you have a very large program on AIB campus, the internship opportunities are really quite amazing. The reality is that the numbers are quite small — always looking for internships. For example, four weeks, six weeks, eight weeks, 12 weeks. If you’re ever in need of finding internships, four weeks, six weeks, eight weeks, 12 weeks. It’s very hard to get a lease for a period of time like that. But with the opportunities that we have in the housing on the AIB campus, where it is apartment style living, we’re going to 13 to 14 bedrooms in a 12-bed colo-

Mason: Not yet. Again, we need to wait for the Higher Learning Commission to give us the green light to go ahead with programming and the things that we do for students. I’ve given you one demonstration that we are already here for how we think the facili-

dy can be used to serve the University of Iowa community and the programmatic thing in Des Moines, so it’s not yet. We’ve got just to go and do anything that seems like there’s some place students in progress. AIB has been new this week that would allow us to have more, which would not be good because we have a large number of students coming to Iowa City just because we have people who would go to the bars or the restaurants because they could, and it became a very dangerous situation for our students especially. It’s not that may way I know it. I think it’s much more healthy and safer than it’s been in a long time. It would be a shame to go backwards.
With the championship season here, it’s time to see what the Hawkeyes are made of.

The Bucks have dropped two of three since they shipped leading scorer Brandon Knight to Phoenix in a three-team trade on Thursday. Milwaukee got Michael Carter-Williams from Philadelphia in the deadline deal, but the point guard has been sidelined by a right foot strain.

“We have to get back up,” coach Jason Kidd said before practice Monday night. “We’ll get him on the floor, we’ll kind of restart, let everyone be comfortable playing with him. Hopefully, that will be soon.”

Asked specifically when Carter-Williams would be back, Kidd responded: “We’ll see.” In the meantime, Jerryd Bayless had 8 points, 8 rebounds, and 5 assists in his third consecutive start at the point. The Bucks looked like a team in transition, without Knight and Carter-Williams.

Chicago Bulls on board

CHICAGO — Tony Snell scored 20 points, Nikola Mirotic had 16 points and a career-high 14 rebounds and the surging Chica- go Bulls completed a sweep of the Milwaukee Bucks on the board on their way to an 87-71 victory on Monday night.

Pau Gasol added 15 points and 16 rebounds as the Bulls enjoyed a whopping 34-25 ad- vantage on the glass. Elton Brand had 10 points and 16 rebounds on his 37th birthday, and Jimmy But- ler finished with 15 points and 9 boards. Milwaukee shot 34 percent (30-of-89) from the field in its second straight loss after a stretch of wins in 10 games. Ersan Ilyasova had 15 points and 13 re- bounds in the first start since Jan. 27 at Miami.

Chicago played out of its normally tidy transition while play- ing fast with 15 watered-down points from the fast break and 21 points from the foot. The Bucks had 15 points, 8 assists and 5 as- sists in their first three meetings.

The Bucks have struggled to survive without Knight and Snell, the Bulls’ leading scorer and a 3-pointer in a 13- 2 run that made it 34-17 with 6:13 left.

The Bucks have been outscored by 40 points in the two meet- ings since they shipped leading scorer Bran- don Knight to Phoenix in a three-team trade on Thursday. Milwaukee got Michael Carter-Williams from Philadelphia in the deadline deal, but the point guard has been sidelined by a right foot strain.

“We have to get back up,” coach Jason Kidd said before practice Monday night. “We’ll get him on the floor, we’ll kind of restart, let everyone be comfortable playing with him. Hopefully, that will be soon.”

Big Ten and are fourth in the NCAA. They also had attendance figures of 1,406 fans per dual average.

For schools such as Missouri — whose average is 2,772 — or Cornell, which averaged 2,491 fans per dual match this year, a crowd of 4,800 plus seems like a whole new world.

“We love wrestling here,” Cornell coach Roll Koll said. “Our guys haven’t been in this environment to their ability to maintain composure.

“With so many fans in one spot, the atmosphere can become wild and entertaining, just as the crowd you can’t hear much on the mat. It is definitely an advantage for Missouri. It missed out on the Big Ten and are fourth in the NCAA Tournament, grabbing a bid for the national tournament.

“Still, Koll said it shouldn’t matter if a team has an advantage or not. What matters most, he said, is that people come out to see good wrestling.

“Our biggest crowd was different, certainly, from what we’ve had in the past. Seven seasons ago, we went 2-8 on the road and just missed out on the NCAA Tournament. In the 2012-13 season, Iowa had a 16-5 record in dual meets, an advantage because you play an up-tempo game.”

“We’re going to give opportunities for our opponents to score more because we’re shooting the ball quickly, as much as I like to look at as scoring margin.”

Just as she anticipated, the offense has nothing to do with it. The Hawkeyes have scored 23 or fewer points only six times. That’s all well and good, but as it turns out, Iowa has glaring weaknesses.

“We are an offensive team, and that’s what we hang our hat on,” Bluder said before the season began. “Do we need to improve on defense? Absolutely. Do we need to work on all of that? But yes. We’re never going to be able to shoot that well.”

“I don’t care who gets the opportunity for us to win,” he said in October. “I don’t care who gets the advantage.”

Even more worrisome than the rebounding, however, is the defense. There is the mounting possibility that the team has accepted the notion it can’t beat teams with defense.

“We are an offensive team, and that’s what we hang our hat on,” Bluder said before the season began. “Do we need to improve on defense? Absolutely. Do we need to work on all of that? But yes. We’re never going to be able to shoot that well.”

Iowa's five true road wins this regular season marks the most for the program since the 2002-03 season.

Missouri wrestling coach Brian Smith did not mind the rowdy, most-ly frustrated crowd of Iowa fans that smacked when he was asked about it, noting that this kind of atmosphere is below average. The Hawkeyes led the venues you go into are just, they're rare. It doesn't matter whether he's in front of 15,500 fans rousing for him or the same number rousing against him. The same goes if Iowa is up by 25 points, knotted in a close game, or getting blown out. It's also probably a product of being part of an experienced team, filled with players who went through the up-and-down nature of last season and have been through their first share of bumps this season.

Whatever the reason, Iowa's success on the road and the manner in which it has won — might be the best thing going for the Hawkeyes when times come to select the field for the NCAA Tournament. "We've got a lot of guys who don't really care where they play," White said. "Just hyp... We've kind of get a demeanor like that in general. Which is a great demeanor to have, because some of the venues you go into are just, they're not. And this place [in Nebraska] was about to be nuts. They were ready to blow the roof of the place, and we never let them get into it. That's what you get to do on the road."

There really is no statistical evidence on why Iowa has won so much success on the road, which hassurfaced with five true road wins, the most for an Iowa team in the regular season since the 2002-03 season. It's also the third-most road wins of any Big Ten team, trailing Wisconsin's eight and Michigan State's six.

Iowa actually allows 2 points per game fewer and scores about 2 points per game more in Big Ten home games this season than on the road. However, an 82-50 road loss to Wisconsin may skew those numbers a bit. Numbers aside, Iowa has four road wins against teams with a top-100 RPI ranking, and two of those are against top-50 RPI-ranked teams — North Carolina (13) and Ohio State (4). "We're an experienced team," Iowa head coach Fran McCaffery said. "We should be able to go on the road, and execute, and follow the game plan, and not get too rattled by the surroundings.

With two more road games remaining on the schedule, the importance of those games can't be stressed enough. In 2013-14, Iowa went 4-6 in regular-season road games. Not a great record on finishing:

Dickerson averaged 2.7 points per game on 34.7 percent shooting. At Iowa before transferring to Hawkeyes last season, Dickerson played 146 minutes in 15 games this season, Iowa appearing on three projected teams, with Iowa appearing right on schedule.

Dickerson's contributions, with Iowa, appear to be more than his scholarship. At Iowa before transferring, he was given his scholarship for his senior-college transfer Trey Dickerson has averaged 2.7 points per game on 34.7 percent shooting.

The Hawkeyes have the right mindset, McCaffery said. "We're an experienced team," Iowa head coach Fran McCaffery said. "We should be able to go on the road, and execute, and follow the game plan, and not get too rattled by the surroundings.
